

An impressive display of superiority.

The First Two Models in the New Apex Edge Series.

Primary and multifunction display units that truly get inside the head of the general aviation pilot. The KFD 840 is the only large-screen retrofit PFD made affordable for piston aircraft under 6,000 lbs. The KSN 770 MFD—available to all general aviation aircraft—represents the next generation in combined navigation/communication technology, and is designed with new and future flight management standards in mind. Install one or both as standalone devices or link with your existing avionics. Certification and delivery in late 2008. **Visit us online to locate your local authorized dealer.**
