

This year we've seen some significant events affect business aviation, but that hasn't stopped Honeywell from delivering some new and exciting technologies -- especially around our Primus Epic® integrated avionics system. Go to www.primusepic.com and see why Primus Epic is always first. Always Epic.

The latest enhancements for two of our flagship Primus Epic systems have just been introduced at the NBAA Annual Meeting and Convention.

Certification Foxtrot for Gulfstream 350, 450, 500, and 550 aircraft -- This upgrade is **certified and is available today!** It features the latest Synthetic Vision Primary Flight display (SV-PFD 2.0), based on Honeywell's award-winning SmartView™ synthetic vision technology. Certification Foxtrot also offers the latest navigation features for greater airspace and airport access with new FMS 7.1 software. Learn more about Certification Foxtrot at www.experiencethevision.com to view a comprehensive website on the safety, efficiency and technology offered with this latest Gulfstream PlaneView® upgrade.

EASy II for Dassault Falcons – The first EASy-equipped Falcons flying in 2003 set a new industry standard for intuitive flying and situational awareness. Since then, the EASy flight deck has won high marks for its revolutionary man-machine interface. With EASy II there is an even smarter way to fly with SmartView synthetic vision system and SmartRunway™ runway awareness and advisory system. EASy II offers the latest navigation technologies with Honeywell's FMS 7.1 software for Primus Epic systems. See all the features for yourself at www.dassaulteasyupgrade.com.
