

# Stay close to your cockpit.

AV8OR.  
The handheld GPS for pilots, at any altitude.

On the Ground

In the Air

Let's be honest. Pilots never really want to leave the cockpit. Introducing the portable GPS by Bendix/King that lets you keep it close. The AV8OR is built specifically for pilots, by a company that knows pilots. With navigation routing and planning for the aircraft and the automobile, the AV8OR uses aviation software and symbology you understand. Its touch screen is larger and easier to read than competing GPS systems. And it's much more affordable. If you're a pilot, don't you deserve a pilot's GPS?
