Dear Genetron® Customer,

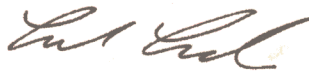

Due to steadily increasing raw material and energy costs, we are forced to increase pricing for Genetron® 134a and all Genetron® blends effective immediately for all product packages by 30% for Europe, Middle East, Africa and India.

Please contact your Honeywell Genetron® Sales Representative for more information or to answer any questions.

This new pricing level also applies for all HFC-134a used in all other applications.

Thank you for your business and continued support of Honeywell Genetron® Refrigerants.

Yours sincerely,

Paul Sanders  
Commercial Director Fluorines EMEAI
