Heverlee, November 16, 2010

Dear Enovate ® 245fa Customers,

Honeywell Fluorine Products Europe B.V. announced today a price increase in Europe, Middle East, Africa and India for its Enovate ® 245fa blowing agent.

The price for bulk and packaged deliveries to this region will increase by 10 percent with immediate effect for new orders or as contracts allow.

Against the background of increasingly high demand for energy efficient HFC's such as Enovate ® 245fa, this increase is driven by the continued pressure on key precursor raw materials (chlorocarbons) and follows significant increases on other HFC's throughout 2010

Your Enovate ® 245fa Account Manager will contact you soon with more information.

Thank you for your business and continued support for Honeywell Enovate ® 245fa blowing agent.

Yours sincerely,

Fabrice Fauré
Sales Manager, EMEA
Honeywell Fluorine Products Europe B.V.
