Heverlee, December 9, 2010

Dear Genetron® Customers,

Honeywell Fluorine Products Europe B.V. announced today a price increase in Europe, Middle East, Africa and India for its Genetron® HFC blends and Genetron® HFC134a. HFC125 and HFC134a, basic building block components for HFC blends, continue to be in global short supply and under raw material pressure.

As a result, the Genetron® HFC134a price for bulk and packaged deliveries to this region, for all applications, will increase by 0.60 EUR/Kg with immediate effect or as contracts allow.

The Genetron® HFC blends prices for bulk and packaged deliveries to this region, for all applications, will increase by 0.80 EUR/Kg with immediate effect or as contracts allow.

Your Genetron® Account Manager will contact you soon with more information. Thank you for your business and continued support for Honeywell Genetron® refrigerants.

Yours sincerely,

Fabrice Fauré
Sales Manager, EMEAI
Honeywell Fluorine Products Europe B.V.
