

Honeywell Generations® Reclaim Program

Manage your reclaim needs in a manner that is friendly to the environment and light as a feather.

Honeywell is the first to offer a unique cylinder that is 40% lighter and more comfortable to carry than traditional steel cylinders!

Honeywell

Honeywell Generations® Reclaim Program

The Honeywell Generations Reclaim Program offers a responsible and economical solution for your reclaim needs. You can return HFC and HCFC refrigerants in a host of different cylinder sizes that meet the needs of your business.

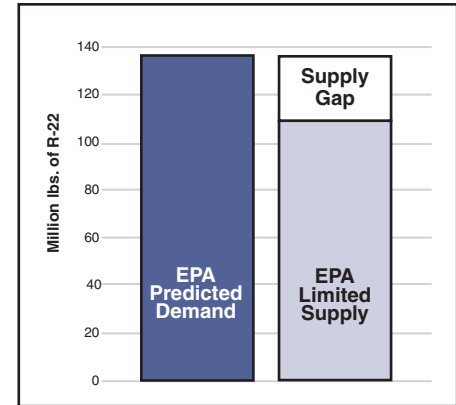

Reclaim containers available:

- 50# composite reclaim cylinder
 - 40% lighter and more comfortable to carry than steel
 - Suitable for all high pressure and low pressure refrigerants
- 50# steel reclaim cylinder
- 125# steel reclaim cylinder
- 1000# steel reclaim tank

Reclaimed refrigerant is processed at Honeywell's Danville, IL facility.

Please contact your Honeywell Genetron Wholesaler for program details.

The EPA estimates that the 27 M lb R-22 supply gap in 2010 will be filled by reclaimed R-22. Reclaim is an important part of R-22 supply!
